Point Energy Management is currently seeking candidates to fill the position of:

Facilities Operations Engineer

Job Role:

- Help lead optimization of our facility operations through:
 1. Minimizing downtime
 2. Maximizing production
 3. Minimizing LOE
 4. Extending facility life and supporting cost-effective recovery from aging wells
- Support continuous improvement of our centralized facilities through a blend of remote monitoring and time spent on site
- Build strong working relationships with Operations Foremen and Production Engineers
- Support preventative maintenance activities including ownership of significant equipment overhauls or replacements, and working with vendors to maintain critical spares holdings
- Support facility upgrades and expansion scopes including input to engineering, procurement and construction, up to and including site project management as appropriate
- Develop work plans and provide site engineering / management support for facility shutdowns, ensuring safety and efficiency
- Work closely with production engineers and the D&C team to ensure gathering systems and centralized facility meet throughput requirements of our field development plans
- Maintain critical drawings and vendor documentation for the facilities
- Champion safe and environmentally responsible production through personal behaviors, activity planning and management, and intelligent facility design

Preferred Background:

- Strong knowledge of upstream oil & gas facilities
- Minimum 3 years within an oil & gas operations organization
- Bachelor's degree (or higher) in relevant engineering discipline (Process or Mechanical preferred)
- Strong project management skills
- Experience with Allen-Bradley HMIs for monitoring and trending process performance
- Field operations experience valued

Notes:

- Salaried position
- Reports to VP of Operations
- Work location: Split time between Fort Worth, TX and Monahans, TX with regular visits to field locations near Barstow, TX
- Point Energy's assets include over 60 producing wells with an active development program bringing ~24 wells online per year

Qualified candidates may send resumes to: hr@pointep.com
