Point Energy Management is currently seeking candidates to fill the position of:

Operations Foreman

Job Role:

- Direct and support well and facility operators ensuring safe, efficient operation of all operating locations, including wells, pipeline infrastructure and facilities through to export
- Help to build and maintain a culture of safety excellence, actively participating in HSE audits, supporting continuous improvement, and ensuring operations personnel comply with all safety policies and procedures
- Responsible for on-boarding, training and mentoring operations personnel
- Support high up-time of facilities and wells through diligent tracking of operational issues and tracking improvement actions to resolution
- Support facility design scopes through hazard and operability reviews and input to safe construction planning
- Carry-out Pre-Startup Safety Reviews (PSSRs), and safe isolation / drain / purge / vent for full facility / system outages
- Actively pursues opportunities to improve field operations through enhancing throughput, improving well / facility uptime, and optimizing LOE / CAPEX
- Plans day to day field activities and helps field operators to manage contractors and vendors at site locations
- Builds strong working relationships with Production Engineers, Facility Operations Engineer and maintenance team
- Issues daily reports related to production, maintenance and ongoing facility modifications and highlights

Preferred Background:

- Previous experience in field operations supervision (min 3 years supervision)
- Demonstrated capability in mentoring and training field operators
- Demonstrated safety leadership
- Excellent knowledge of upstream oil & gas facilities, including experience operating separation, compressor packages, H-pumps, VRUs, and connected facilities
- Experience with PLC based operations, including facilities with high levels of automation

Notes:

- Salaried position
- Reports to Field Superintendent
- Work location: Field locations near Barstow, TX
- Point Energy's assets include over 60 producing wells with an active development program bringing ~24 wells online per year
